DETAILED ACTION

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Applicant's arguments found on pages 5-6, regarding the combination of Uesugi and Jersch are considered convincing, thus the rejection is withdrawn. Uesugi teaches using light to decompose the precursor vapor, not surface plasmons or the electromagnetic fields they create. Jersch is not focusing light or even producing more intense light. It is producing an intense electromagnetic field by surfaces plasmons created by irradiating an AFM tip. Thus, there is not reasonable teaching or suggestion in the prior art of record to do so in order to decompose a gas for film deposition. Thus the claimed invention is considered non-obvious and is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOEL HORNING whose telephone number is (571)270-5357. The examiner can normally be reached on M-F 9-5pm with alternating Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael B. Cleveland can be reached on (571)272-1418. The fax phone
